Features of Solar Collector

1. Our solar collector can be manufactured in special design for overseas markets with special anodized aluminum alloy frame, featuring aesthetic appearance and it can bear high pressure without leakage.
2. Installation with 50mm fiber glass insulation and EPDM seal strip assure that the solar collector can work under harsh and very cold temperature.
3. The patterned tempered glass or low-iron tempered glass (4mm thickness) of our solar collector is not easy to break and it has very high transmission and low emission to ensure high solar yields.
4. The operation temperature of our collector is $-33^{\circ}\text{C} \sim 120^{\circ}\text{C}$.
5. Our solar collector has passed EN12975 -1,2 test.
6. This product is also certified by Solar Keymark.

Technical Specification of Solar Collector

Inner tank	SUS304-2B ($\delta=0.35$), Color: natural color
Shell of tank	Aluminum-zinc coated steel plate ($\delta=0.4$) Color: silver gray
End cap	Galvanized steel plate with plastic spraying ($\delta=0.4$), Color: magenta
Bracket	Galvanized steel plate with plastic spraying ($\delta=1.1$), Color: magenta
Vacuum tube type	$\phi 58 \times 1800$, T super tube
Fivestar FS-III Colorful Screen Intelligent Controller	Optional
Models available	14 tubes, 18 tubes, 22 tubes

Solar Collector
